FLO~PRO

Performance Exhaust

Put Pride in your Ride

FLO~PRO introduces its new performance exhaust systems for gas power engines. Like our large diameter 4" and 5" diesel systems, our gas systems are all performance and save you the stress from interior cab noise synonymous with performance exhaust and big block engines.

GM 6.0L & 8.1L

All vehicles are not created equal so using the same muffler really isn't logical. Each system is custom tuned and fit for the specific vehicle. Performance is our #1 priority, but controlling interior noise levels is also important. At FLO~PRO, we're about making power not just noise.

O.E. restricted to 1" Y on Titan

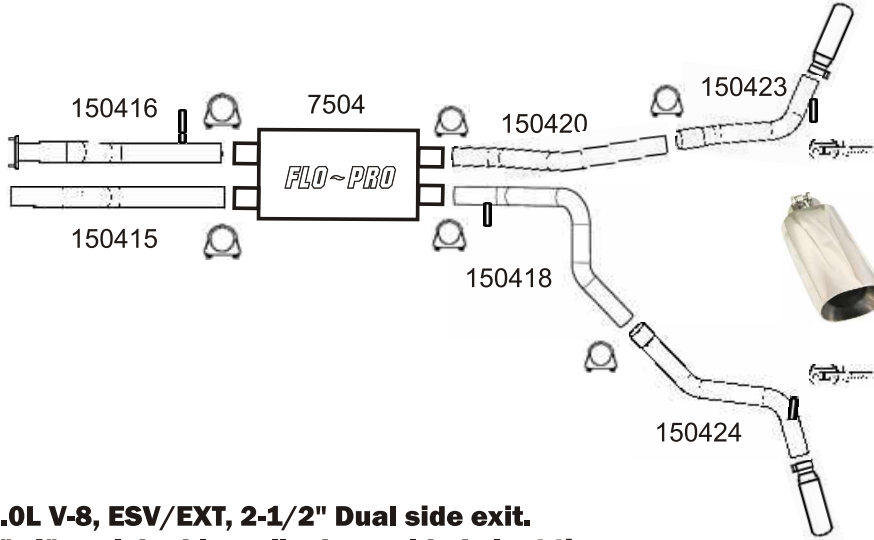

Full flowing true dual mandrel bends on Titan.

Every detail was considered including eliminating restrictive O.E. Y transitions and using longer luster double wall stainless tips. Our systems are designed for excellent fit and easy installation. Made with stainless steel materials for looks and longevity. Large diameter mandrel bent singles, rear duals and side duals on most applications.
