FLO ~ PRO

PERFORMANCE EXHAUST

We're all about options at **FLO~PRO**

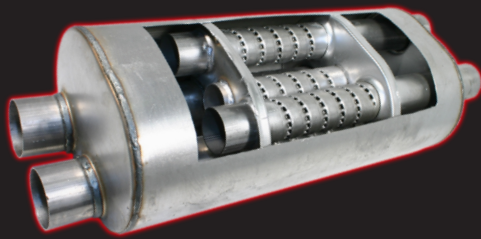

Not all mufflers, vehicles and customers are created equal. Our selection of direct and universal fit mufflers offer a wide variety of sound and performance gains that will be sure to satisfy even the most particular customers. Here is a quick look at your options from FLO~PRO.

Original FLO~PRO's offer great sound and performance. It offers a deep performance sound with minimal interior resonance. Performance without punishment helps explain these attributes best. Aluminized construction and available in 4 1/4" X 9 3/4" when ground clearance is an issue and 4 3/4" X 11" for big block applications and mellower tone.

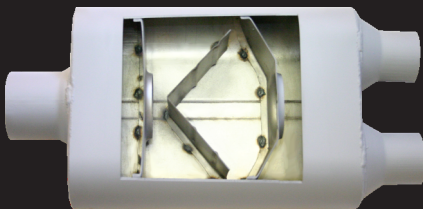

The Stainless Steel MAX muffler offers the best flow possible with a straight through perforated flow tube. An excellent deep sound quality that only a packed muffler can offer. The MAX lives up to its name in performance, sound and quality.

We don't call this FLO~PRO the 2500HD Big Oval for nothing. 9" X 12" body size offers the best in performance and sound qualities available for large gas and diesel engines. Great performance with the least interior resonance is the key to its success especially on Big Block engines. The only true dual outlet muffler available for 4" diesel duals gives you the best performance and sound from your diesel pickup.

Heavy Duty Truck Mufflers are made of 100% Aluminized Steel all welded construction. Available in 6", 7" & 8" Round body sizes and inlet and outlet from 2" - 5". Can be installed on a variety of cars, pickups, and medium duty applications.

Super V mufflers offer that aggressive V baffle style sound so popular with the younger generation. 100% aluminized all welded construction is sure to give many years of worry free performance for the sport enthusiast. Originally designed for muscle car enthusiasts, but excellent for Pickup, SUV's and anyone looking for a more aggressive sound.

TWISTER Race mufflers blow away the competition with its continuous spiral design for minimal back pressure and horse power loss vs open headers. It's the race muffler that fits in tight places and reduces noise to meet most track requirements. Available in 2 1/4" - 5" inlets also works great for a resonator on noisy diesel applications.

The Only Packing in this Baby... is The Punch!

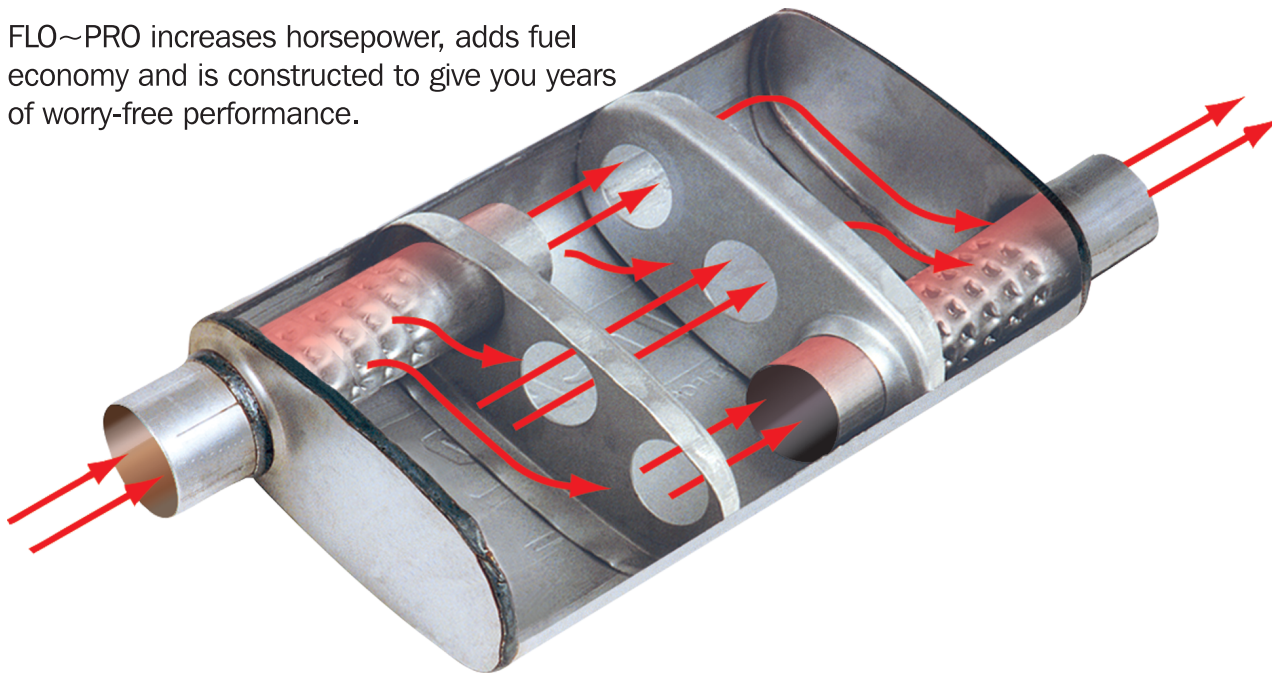

FLO~PRO has proven it beats the competition with louvered pipe that accelerates the exhaust flow through our muffler. The louvers also give a deep performance sound without the use of fiberglass that eventually blows out!

FLO~PRO performance mufflers are designed to boost the horsepower generated from your street vehicle.

The 100% Aluminized steel welded construction will outlast conventional locked-seam, double wrap mufflers.

The Answer is Obvious...

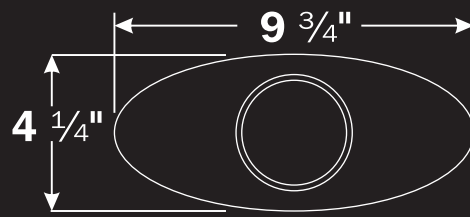

FLO~PRO increases horsepower, adds fuel economy and is constructed to give you years of worry-free performance.

MAX

www.flopro.com

Increased number of smaller holes eliminates blowout and maintains a deep toned performance sound.

Large diameter mandrel bent one-piece stainless steel core. Straight through for low restriction.

Heavy gauge stainless steel construction.

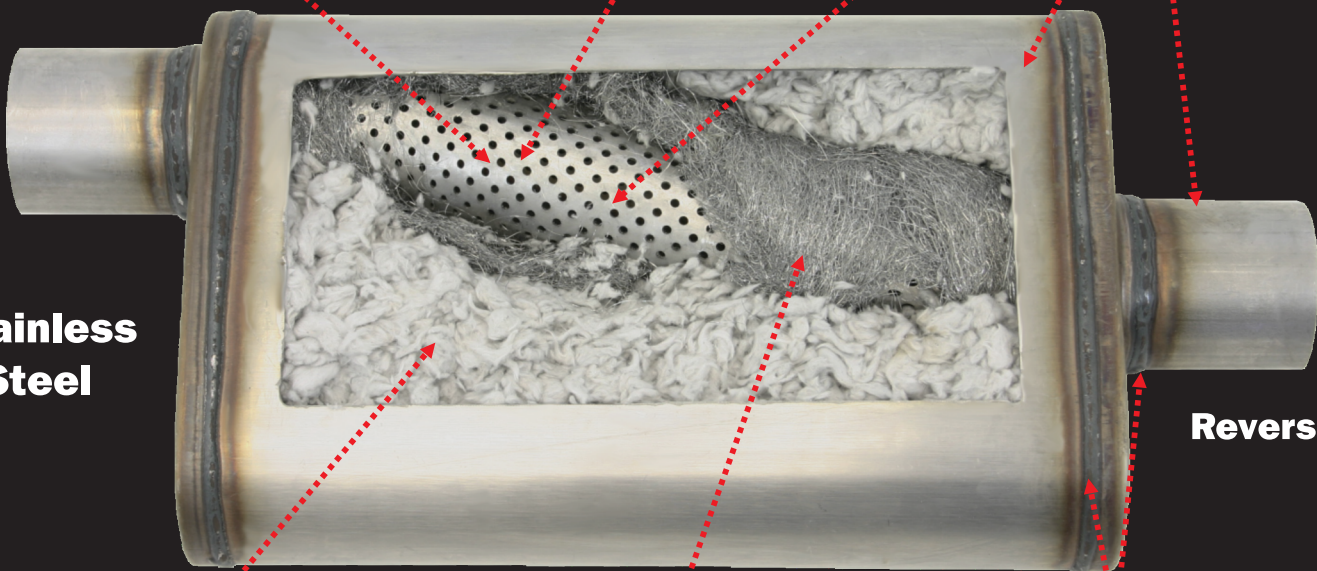

Stainless Steel

Reversible

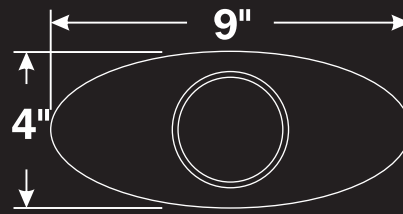

Densely packed with high temp sound absorbing material resists meltdown, matting and blowout.

Thick stainless steel mesh adds additional sound absorption and prevents against blowout.

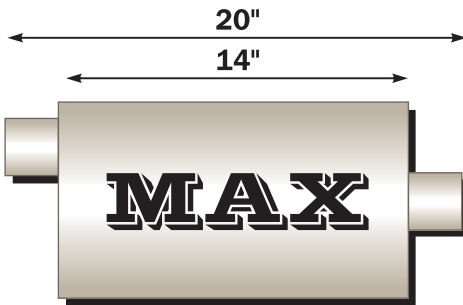

All welded seams and joints for toughness and durability.
